MARSOFT MAKES BUILDING AN ONLINE PHOTO ALBUM EASY *Online Photo Sharing Made Simple*

Albuquerque, New Mexico (Saturday, November 22, 2008) – **Marsoft, LLC** offers yet another way for you to use your domain name with Online Photo Filer, an affordable, easy-to-use method for sharing photos on the World Wide Web. Whether you are a shutterbug or an Internet amateur, Online Photo Filer is a cinch to use and best of all, your family, friends and colleagues can view your images without the hassle of logging in.

Online Photo Filer is a photo manager that helps users store and present their images on a specialized Web site, at their own domain name. By registering a personalized Web address, you can give your friends and family an easy-to-remember and relevant address to view your favorite photos. Your viewers can order wallet through poster-sized prints directly from the application and have them shipped to their door.

The service supports single photo or bulk upload options, whereby you may add entire directories to your online collection. Once uploaded, you can choose from a variety of editing options, all managed from the comfort of your own domain name. Individual galleries may be password protected, kept private or shared publicly.

The Photo Marketing Association International (pmai.org) estimated that 20.5 million digital cameras were sold in 2005. This drove demands for 7.7 billion digital prints; digital photography is here to stay.

More information about Online Photo Filer is available at **Web Mazda** (www.WebMazda.Com)

About Marsoft, LLC.

Marsoft, LLC Was established in 2008, in Albuquerque, New Mexico.

We are a group of IT professionals with many years of collective hands-on experience, providing a wide variety of computer and information technology services to small businesses. We are sole owner of Point Of Donation [™], an evolutionary innovation and its trademark.

Our dedicated and educated team of experts would be a great asset to your small business, when it comes to information technology.
